Shusen Ni

nss22@mails.tsinghua.edu.cn | shusen-ni.github.io

Ph.D. Candidate in Electrical Engineering, Tsinghua University, Beijing, China

Research Interests: high-performance control and fault-tolerant control of multiphase motor drives.

EDUCATION

2022 – 2027 **Ph.D., Electrical Engineering, Tsinghua University**
Department of Electrical Engineering
Advisor: Prof. Zedong Zheng **GPA:** 3.9/4.0
Selected Honors: **China Association for Science and Technology Young Scientific and Technological Talent Development Program for Doctoral Students**;
Outstanding Student Scholarship (Top 5%), three times

2018 – 2022 **B.Eng., Electrical Engineering and Automation, Shandong University**
Department of Electrical Engineering
GPA: 94.2/100 **Rank:** 1/241
Selected Honors: **Honorary Bachelor's Degree (Top 2%)**; **President Scholarship (Top 0.1%)**;
National Scholarship (Top 2%), three times; Outstanding Graduate

RESEARCH PROJECTS

Sep. 2022 – Dec. 2025

National Natural Science Foundation of China Key Joint Fund Project
High-power, high-performance multiphase permanent-magnet direct-drive electric propulsion systems
Core Researcher

- Proposed a **fundamental–harmonic current decoupling** method based on generalized symmetrical components and virtual phase shifting for multiphase machines under asymmetric operation.
- Developed a hybrid SiC/Si bridge-leg inverter topology and coordinated control strategy, reducing propulsion-system loss by **30%** and inverter cost by **35%**.
- Proposed a generalized construction method for **series-connected DC-link-capacitor topologies** in multiphase MVDC propulsion systems and developed a coordinated-control-based capacitor-voltage-balancing strategy.
- Developed an online per-phase resistance monitoring method and active phase-current derating strategies for **intelligent fault-tolerant control** of multiphase motor drives.

Jan. 2023 – Dec. 2024

National Key Research and Development Program of China
High-quality intelligent coordinated control systems for in-wheel motors
Core Researcher

- Led **full-cycle controller algorithm development and validation**, spanning prototype development, bench testing, and vehicle-level integration.
- Designed and implemented high-speed flux-weakening control, variable-switching-frequency operation, and control-delay compensation for carrier-phase-shifted PWM.
- Successfully deployed and validated the control system on five prototype vehicles and obtained **vehicle type approval** from China's Ministry of Industry and Information Technology (MIIT).

Sep. 2025 – Present

Fundamental and Interdisciplinary Disciplines Breakthrough Plan of the Ministry of Education of China
Aviation electrical equipment and next-generation megawatt-class generation systems
Core Researcher

- Contributed to project proposal development and system-architecture planning for next-generation megawatt-class aviation electrical generation systems.
- Conducted preliminary research on **SiC-based megawatt-class** power-conversion solutions for aviation electrical generation systems.

Sep. 2025 – Apr. 2026

Chenxiang Innovation Award Project, CRRC Zhuzhou Institute Co., Ltd.
Equivalent-circuit modeling and parameter tuning for high-power high-frequency transformers
Core Researcher

- Developed high-frequency transformer models with parasitic capacitance, leakage inductance, and AC resistance; achieved frequency-analysis error within 1%.
- Contributed to automated software for parameter extraction, modeling, and resonance-frequency analysis.
- Received the **only Gold Award among regular projects**.

TEACHING EXPERIENCE

2023 – 2026 | **Teaching Assistant** | **Electric Machinery**
Tsinghua University
Supported lectures, homework guidance, and experiment supervision. Led **hands-on transformer projects** in which students applied electrical-machine theory to design, build, and test their own transformers.

2023 – 2025 | **Teaching Assistant** | **Electric Machine Design, Analysis, and Control**
Tsinghua University
Helped develop the course and guided undergraduates through the design, fabrication, and testing of a **permanent-magnet synchronous motor**. Guided undergraduates in extending their course projects into research, resulting in a published international conference paper.

WORK EXPERIENCE

Jul.–Sep. 2024

Internship, Dongfeng Motor Corporation R&D Institute
Electric Drive Systems, New Energy Vehicles

- Participated in a motor temperature-estimation project for electric vehicle drive systems; identified the root cause of high-speed motor temperature-estimation bias.

- Proposed and validated corrective solutions that improved online temperature-estimation accuracy by **more than 50%** and supported final **vehicle-level implementation**.

MENTORING

Assisted my advisor in mentoring several students.

Xiaohan Sun, Yicuan Chuan, Yufei Wang, and Sui Li Sep. 2024–Dec. 2024
Undergraduate students, Department of Electrical Engineering, Tsinghua University

Topic: Comparative performance analysis of fractional-slot nine-phase and three-phase motors based on winding reconfiguration.

Publication: X. Sun, Y. Chuan, Y. Wang, S. Li, **S. Ni**, and Z. Zheng, "Comparative Performance Analysis of Fractional-Slot Nine-Phase and Three-Phase Motors Based on Winding Reconfiguration," *2026 IEEE 9th International Electrical and Energy Conference (CIEEC)*, Tianjin, China, 2026, pp. 2001–2008, doi: 10.1109/CIEEC69682.2026.11571994.

Yongbo Li 2023–2025
Joint Master's student, Beijing Institute of Technology (Advisor: Prof. Hongwei Ma)

Topic: High-performance multiphase motor control algorithm based on deep reinforcement learning.

Publication: Y. Li, **S. Ni**, H. Ma, and Z. Zheng, "Current Harmonic Suppression of Dual Three-Phase PMSM Based on an H_∞ and MPC Hybrid Control," *2025 IEEE International Conference on Predictive Control of Electrical Drives and Power Electronics (PRECEDE)*, Nanjing, China, 2025, pp. 1–6, doi: 10.1109/PRECEDE63178.2025.11130983.

Huiping Li 2022–2023
Joint Master's student, School of Electrical and Control Engineering, Liaoning Technical University (Advisor: Prof. Zhiling Ren)

Topic: High-performance multiphase inverter control.

AWARDS AND RECOGNITIONS

2026 **Best Innovation Award, 2026 Young Professionals Exhibition and Competition**
Awarded by IET Hong Kong

2026 **Gold Award, CRRC Zhuzhou Institute Chenxiang Innovation Award**
Awarded by the Zhuzhou Institute of China Railway Rolling Stock Corporation (CRRC); the only Gold Award among regular projects.

2025 **China Association for Science and Technology (CAST) Young Scientific and Technological Talent Development Program for Doctoral Students**
One of eight nationwide nominees recommended by the China Power Supply Society (CPSS)

2025 **Tsinghua Friends–TBEA Talent Scholarship**
Awarded by Department of Electrical Engineering, Tsinghua University

2025 **Outstanding Student Scholarship (Top 5%)**
Awarded by Tsinghua University

2025 **Best Presentation Award, IEEE PEAS 2025**
Awarded by IEEE and China Power Supply Society

2024 **Outstanding Student Scholarship (Top 5%)**
Awarded by Tsinghua University

2024 **Student Paper Award, ICEMS 2024**
Awarded at the 27th International Conference on Electrical Machines and Systems

2024 **Second Prize, ABB Cup Intelligent Technology Innovation Competition**
Awarded by ABB and the Chinese Association of Automation

2023 **Tsinghua Friends–Orient Cable Talent Scholarship**
Awarded by Department of Electrical Engineering, Tsinghua University

2023 **Outstanding Student Scholarship (Top 5%)**
Awarded by Tsinghua University

2023 **Best Paper Award, ICEMS 2023**
Awarded at the 26th International Conference on Electrical Machines and Systems

2022 **Outstanding Graduate and Outstanding Undergraduate Thesis**
Awarded by Shandong University

2022 **Honorary Bachelor's Degree (Top 2%)**
Awarded by Shandong University

2021 **President Scholarship (Top 0.1%)**
Awarded by Shandong University

2021 **National Scholarship (Top 2%)**
Awarded by the Chinese Ministry of Education

2020 **First Prize, National Undergraduate Electronics Design Contest**
Awarded by the Department of Education of Shandong Province, China

2020 **Outstanding Student of Shandong Province**
Awarded by Shandong Provincial Department of Education

2020 **National Scholarship (Top 2%)**
Awarded by the Chinese Ministry of Education

2019 **National Scholarship (Top 2%)**
Awarded by the Chinese Ministry of Education

2019 **First Prize, Chinese Mathematics Competitions for College Students**
Awarded by the Chinese Mathematical Society

ACADEMIC SERVICE

2025 **Session Chair**, Tsinghua–IET Academic Conference

2024 – Present **Reviewer**, *IEEE Transactions on Power Electronics*

2025 – Present **Reviewer**, *IEEE Transactions on Industrial Electronics*

2026 – Present **Reviewer**, *IEEE Journal of Emerging and Selected Topics in Power Electronics*

2026 **Reviewer**, IEEE Transportation Electrification Conference and Expo (ITEC)

2025 – 2026 **Reviewer**, IEEE Applied Power Electronics Conference and Exposition (APEC)

2024 – 2025 **Reviewer**, IEEE Energy Conversion Congress and Exposition (ECCE)

TECHNICAL SKILLS

Programming Languages: VHDL, Verilog, Python, C#, C/C++

Software: Simplorer, MATLAB/Simulink, Code Composer Studio (CCS), Quartus, Altium Designer, Ansys Maxwell
